

CREATING A CLOUD OBJECT STORAGE SERVICE

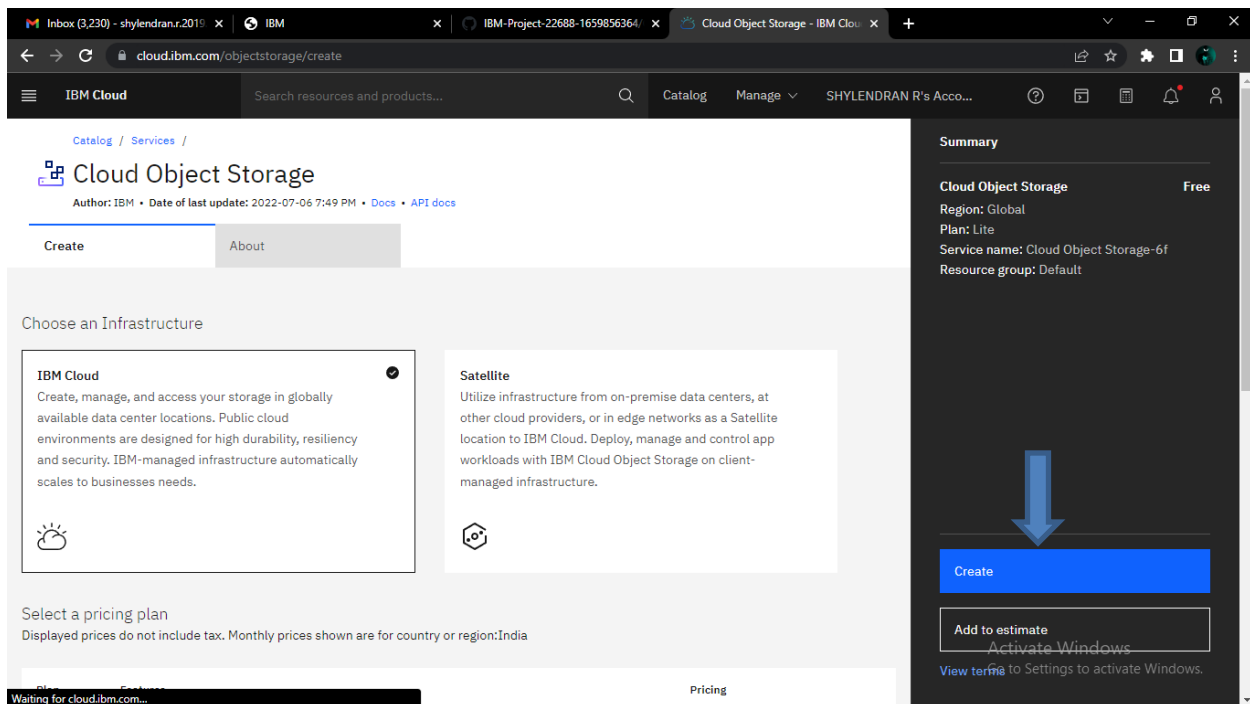

STEP:1 Login to cloud.ibm.com with your IBMCloud Account. Select Catalog .

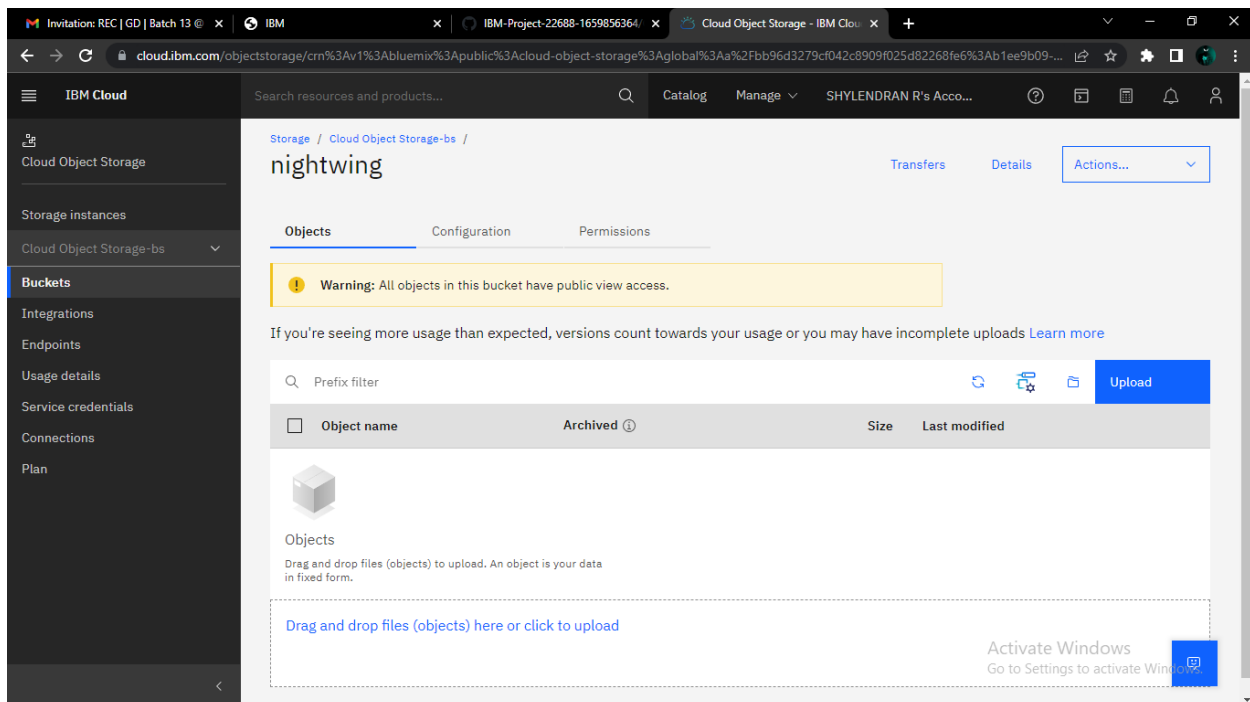

STEP:2 On the Left side, Scroll down and choose Services under Type. And Select Storage Above. Under that choose 'Object Storage'.

STEP:3 Click on Create and choose a username and create a bucket .

STEP:4 After Creating a Bucket, you can upload your files in your object storage

STEP:5 Click on Service Credentials and node down the key.

The screenshot shows the IBM Cloud console interface. On the left is a dark sidebar with navigation links: Cloud Object Storage, Storage instances, Cloud Object Storage-bs, Buckets, Integrations, Endpoints, Usage details, **Service credentials** (highlighted), Connections, and Plan. The main content area is titled 'Service credentials' and includes a sub-header: 'You can generate a new set of credentials for cases where you want to manually connect an app or external consumer to an IBM Cloud service. [Learn more](#)'. Below this is a search bar and a '+ New credential' button. A table lists the credentials, with one entry 'Service credentials-1' created on '2022-11-16 8:19 PM'. The details for this credential are expanded, showing a JSON object with fields like 'apikey', 'endpoints', 'iam_apikey_description', 'iam_apikey_name', 'iam_role_crn', 'iam_serviceid_crn', 'ServiceId', and 'resource_instance_id'. At the bottom right, there is a 'Activate Windows' watermark.
