PROJECT NAME	IoT Based Smart Crop Protection System For Agriculture
TEAM ID	PNT2022TMID26521

1. Write code and connections in wokwi for the ultrasonic sensor. Whenever the distance is less than 100 cms send an "alert" to the IBM cloud and display in the device recent events. Upload document with wokwi share link and images of IBM cloud.

```
#define TRIGGER_GPI
#include <stdio.h>

#include <freertos/task.h>
#include <esp_err.h>
#include "ultrasonic.h"#define ECHO_GPIO O 13
#define MAX_DISTANCE_CM 500 // Maximum of 5 meters

void ultrasonic_test(void *pvParameters)
{
    float distance;

    ultrasonic_sensor_t sensor = {
        .trigger_pin = TRIGGER_GPIO,
        .echo_pin = ECHO_GPIO
    };

    ultrasonic_init(&sensor
);while (true) {
    esp_err_t res = ultrasonic_measure(&sensor,
```

```

MAX_DISTANCE_CM, &distance);
